

What is Physical Therapy?

Physical therapy services are offered to patients of all ages who need assistance to move and function. From athletes to geriatrics, dedicated therapists work one-on-one with patients, helping them to overcome limitations and achieve full recovery potential.

How Can I Benefit From Physical Therapy?

If you have one of the following conditions, you may benefit from physical therapy:

- back and neck pain
- arthritis
- pain after an automobile accident
- work-related injuries
- muscle weakness and low endurance
- pregnancy-related back pains
- headaches
- walking and balance problems
- Parkinson's and MS
- COPD
- Wounds/Burns
- Diabetic Neuropathy

We are currently accepting new patients with acute (sudden) injuries, neurological (brain and spine) disorders, post-surgery, or chronic (long-term) conditions.

What Will I Do In Physical Therapy?

You may receive some of the following during your care. This includes specific exercises to address muscle weakness, stiffness, and low endurance, manual treatments, methods for pain relief and education to help improve your lifestyle and overall function. Our specialities include:

Pain Management
Lymphedema Management
Vestibular/Balance Disorders
Diabetic Foot Education
Posture/Body Mechanics Training
Sports Injuries
Wound Management
Pre-Employment Test
Development/Performance
Urinary Incontinence
Pelvic Floor Pain
LBP Associated with Pregnancy

How To Make An Appointment

In order to make an appointment with a Physical Therapist, you must obtain a dated prescription for Physical Therapy from your doctor with your diagnosis. If you are having difficulty you may contact either of our locations and we will assist you.

Treatment Staff

Our physical therapists have over 75 years of experience. We are experts in the examination and treatment of problems that affect people's abilities to move and function. The abilities are driven by four major systems in the body: musculoskeletal, neuromuscular, cardiovascular/pulmonary, and integumentary. Our physical therapists are educated and experienced to manage all four systems.

Our therapists will help patients return to an active life as quickly as possible through an individualized treatment plan.
